Dear Hiring Manager

I am writing to express my interest in the QA and Test Automation Engineer position at Fictiv with 1.6 years of hands-on experience in software quality assurance, I have developed a solid foundation in manual and automated testing, defect tracking, and ensuring software quality in fast-paced IT environments.

In my previous role at Cornerstone on Demand, I was responsible for:

- Creating and executing test cases based on functional requirements
- Logging and tracking defects using JIRA.
- Performing regression, smoke, and sanity testing across web and mobile applications.
- Also have experience API testing GET, POST, PUT, DELETE.
- Collaborating closely with developers and product teams to ensure timely bug resolution and release quality.
- Used testrail as test cases management Tools.

I am familiar with tools such as Testrigor , TestNG, Postman, SQL, Playwright , Carina Framework(Selenium based) and I have experience working in Agile/Scrum environments. My attention to detail, strong analytical skills, and commitment to delivering high-quality software make me a strong fit for your QA team.

What excites me about Fictiv is your commitment to innovation and quality. I am eager to contribute to your mission by ensuring that your applications meet the highest standards of functionality and reliability.

Thank you for considering my application. I have attached my resume for your review and would welcome the opportunity to discuss how my background in QA can benefit your team. Please feel free to contact me at your convenience.

Sincerely,

**Harshita Ahirwar**
